ABOUT DENSO

An OE Heritage

DENSO is one of the world's largest automotive component suppliers with over \$35.9 billion in annual sales. We supply every major auto manufacturer in the world, providing them with the quality and innovation they need to remain on the leading edge of automotive technology. In addition to our automotive customers, we also supply components to virtually all OE manufacturers worldwide. For decades we have helped all of our customers to become giants in their industries.

Unsurpassed Quality

At DENSO we know that one of the major keys to success for our company and our customers is an unwavering commitment to quality. We strive for, and achieve, zero defects for parts manufactured in the millions in DENSO facilities that are ISO9000 and ISO14000 certified. This dedication to quality is clearly recognized by the industry as DENSO has received such prestigious awards as the Deming Award for Quality, the J.D. Power and Associates Chairman's Award and numerous supplier awards for quality from companies like Toyota, Lexus, General Motors and Chrysler.

Bringing It All To The Aftermarket

In the 1980s, DENSO became the first to mass-produce the platinum spark plug and offer it in the aftermarket. A decade later we introduced the world's most advanced spark plug, Iridium Power®, which revolutionized the concept of the aftermarket performance plug. By the late 1990s, the world watched with great interest as DENSO unveiled

a line of OE-standard premium replacement components under the First Time Fit® brand. Today, the First Time Fit line of products includes A/C compressors, cabin air filters, condensers, evaporators, radiators, receiver driers, expansion devices, starters, alternators, oxygen sensors, fuel pumps, oil and air filters, ignition wire sets, tire pressure monitoring system sensors, engine management sensors and wiper blades.

DENSO is one of the world's largest automotive component suppliers with over \$35.9 billion in annual sales.

Better By Design

As you can see, we've spent decades perfecting our craft — a claim few automotive component manufacturers can make. Clearly the DENSO commitment to quality, innovation, and advanced technology is the reason our automotive and heavy-duty components truly are better by design.

HOW TO USE THIS CATALOG

To find a unit based on application (Application Section):

- 1. Locate the application on the page. Applications are sequenced by Year, Make, Model and Engine Type.
- 2. Find the application line that describes the vehicle options and locate the part number.

To find a DENSO part number based on an alternate part number (Cross Reference Section):

- 1. Locate the part number tag on the unit.
- 2. Locate the Cross Reference section of this catalog.
- 3. Locate the Manufacturer's Name and part number.
- 4. The DENSO part numbers are listed on the column to the right of the unit number.

To compare part with part number listing (Photo Guide Section):

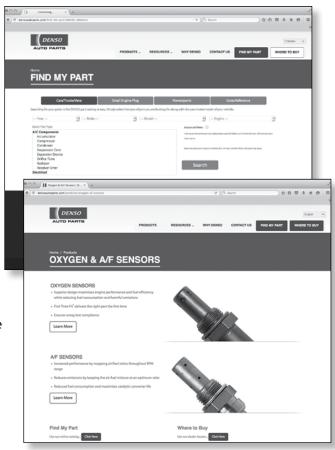

- 1. Find the part number listing as described above.
- 2. Locate Photo Guide section in this catalog.
- 3. Find the DENSO part number listed in the catalog. Images are sequenced by DENSO number.
- 4. Compare published unit specifications with the unit from the vehicle.

UPDATES ON THE WEB

For the most recent application information and images of DENSO products, go to DENSO's aftermarket website. Log on to www.DensoAutoParts.com and click on the "Find My Part" link at the top of the page.

- 1. Log on to www.DensoAutoParts.com
- 2. Click on the "Find My Part" link at the top of the page.
- 3. Select your product by type or cross-reference.
- 4. Choose the Year, Make and Model of your application.
- 5. Click SUBMIT.

The screen will return the part number and application information. If an image or schematic is available, you'll see a picture icon. Click on the icon to view the image(s).

THE CRITICAL ENGINE COMPONENT

A critical component of today's modern vehicle is the sensor measuring the exhaust gases. This sensor works with the vehicle Electronic Control Unit (ECU) to constantly maintain the operational efficiency of the engine. If the oxygen content in the exhaust gas is too high (a lean mixture) or too low (a rich mixture), the sensor is able to transmit this information back to the ECU, which then adjusts the air to fuel ratio.

Not all vehicles have sensors with the same output characteristics and these sensors are not interchangeable. It is important to confirm sensor type before making the repair.

In vehicles equipped with a heated oxygen sensor, the output voltage changes in accordance with the oxygen concentration in the exhaust gas. The ECU uses this output voltage to determine whether the present air/fuel ratio is richer or leaner than the stoichiometric air/fuel ratio (14.7:1).

Vehicles equipped with an air/fuel ratio sensor have approximately 0.4 V constantly applied to the sensor, which outputs a current that varies in accordance with the oxygen concentration in the exhaust gas. The ECU converts the changes in the output current into voltage allowing a response that is directly proportional to the input of the present air/fuel ratio in the exhaust system.

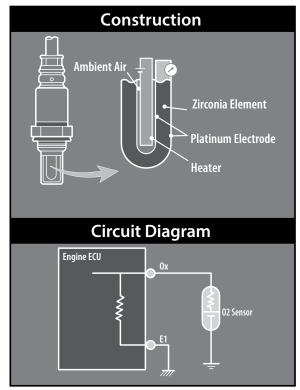

DIFFERENCES BETWEEN AN OXYGEN SENSOR AND AN AIR/FUEL SENSOR

The exterior appearance of air/fuel sensor and oxygen sensor may be very similar but that's where the similarity stops. Using a light bulb analogy, the oxygen sensor sends voltage to the vehicle engine control unit and acts like an on/off switch turning the bulb on and off. The air/fuel sensor receives voltage from the vehicle engine control unit and acts like a dimmer switch making the bulb brighten and dim.

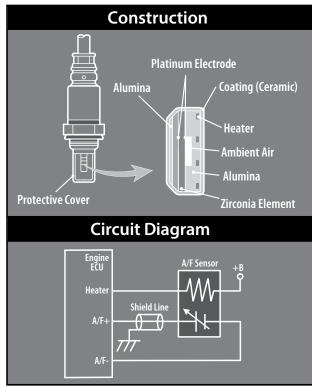

Air/Fuel Sensor

SUPERIOR OXYGEN SENSOR TECHNOLOGY

SUPERIOR DESIGN

Maximizes engine performance and fuel efficiency while reducing harmful emissions.

DOUBLE PROTECTION COVER

Maintains proper unit temperature for quicker response times and protects the ceramic element against silicone and lead poisoning.

ALUMINUM-OXIDE TRAP LAYER

Keeps silicone and lead outside the ceramic element through DENSO's exclusive design, preventing damage to the platinum electrode.

STAINLESS STEEL HOUSING

Resists corrosion and contamination with a rugged, watertight body.

POROUS PTFE FILTER

Allows atmospheric oxygen to enter the sensor without permitting water or engine contaminants to seep into the casing.

Designed with precision. Manufactured to the strictest OE standards. Subjected to rigorous safety and performance tests. These are the core building tools behind DENSO First Time Fit oxygen sensors, a new line of heated and non-heated configurations guaranteed to fit right the first time, every time. This innovative line features DENSO's exclusive aluminum-oxide trap layer, designed to protect the ceramic element from silicone and lead poisoning for improved engine performance, greater fuel efficiency and unparalleled longevity. Of course, the First Time Fit line of oxygen sensors is just one of many design innovations. DENSO First Time Fit, Better by Design.

SUPERIOR AIR/FUEL SENSOR TECHNOLOGY

Air/Fuel Sensor

As with the oxygen sensor, an air/fuel sensor detects the oxygen concentration in the exhaust emissions. However, vehicles equipped with this sensor, have approximately 0.4 V constantly applied to the air/fuel sensor, which outputs a current that varies in accordance with the oxygen concentration in the exhaust gas. The ECM converts the changes in the output current into voltage allowing a response that is directly proportional to the input of the present detected air/fuel ratio.

Features and Benefits

- Quick activation of zirconia solid electrolyte
 DENSO's planar type air/fuel sensor has a zirconia solid electrolyte integrated with an alumina
 heater substrate, allowing it to more quickly detect oxygen concentration with a light-off time of
 10 seconds.
- High-detection accuracy
 Precisely controls the amount of oxygen ions that flow in the diffusion layer to limit current flow, resulting in high-accuracy detection.

Air/Fuel Product Types

OXYGEN SENSOR POSITIONING

Many manufacturer's catalogs identify the left and right side positioning; however, diagnostic tools refer to sensor locations by Bank and Sensor (e.g. Bank 1 Sensor 1).

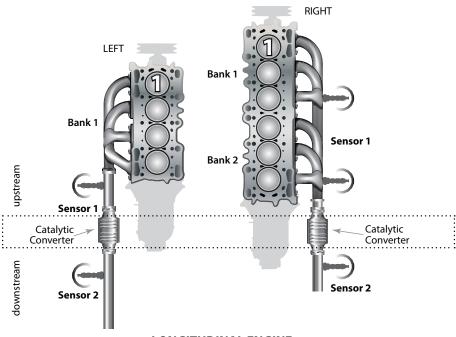

As a general rule, the leading cylinder (Cylinder 1) is the designator of Bank 1.

The longitudinal engine orientation illustrations depict rear-wheel drive. In cases of transverse engine (front wheel drive), the concepts are the same, however the mounting direction is at a 90 degree rotation left or right from longitudinal.

DENSO categorizes left and right sides to the engine block from the viewpoint of the transmission to the crank pulley.

Inline Single / Split 4/5/6 Cylinder

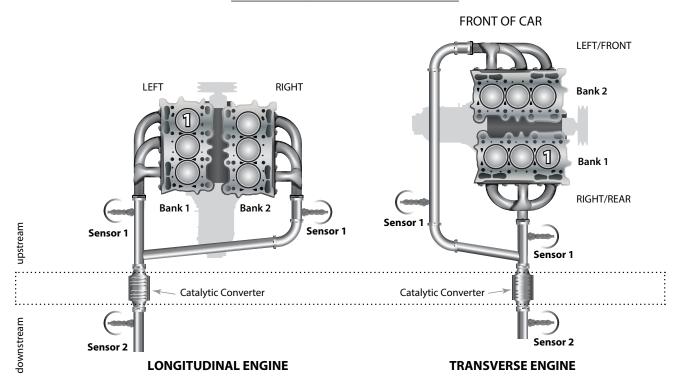

LONGITUDINAL ENGINE

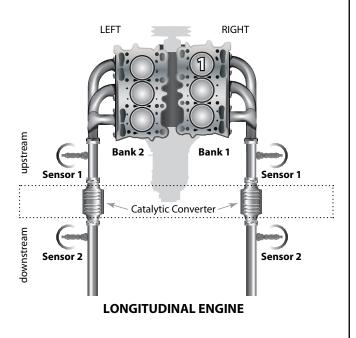

Engine configurations will vary, please review your service manual or online technical references for accurate engine configuration.

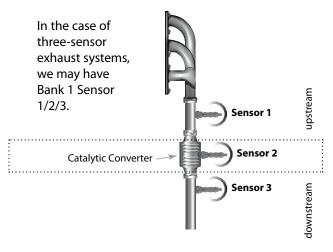

V6/8/10 Type Single Exhaust

V6/8/10 Type Dual Exhaust

Three-Sensor Exhaust Systems

Engine configurations will vary, please review your service manual or online technical references for accurate engine configuration.

Causes For Air/Fuel Codes

Causes of a Rich Condition

· Plugged air filter

• Faulty ECU

• Faulty air mass meter

· Faulty air flow meter

• Faulty MAP sensor

• Faulty idle control valve

• Faulty fuel pressure regulator

• Faulty fuel injector(s)

• Restricted fuel return line

Fouled spark plug(s)

• Faulty ignition wire(s)

• Ignition timing

• Faulty oxygen sensor

• Faulty air fuel sensor

Faulty PCV

• Faulty EVAP

NOTES

À PROPOS DE DENSO

Un héritage OE

DENSO est l'un des plus grands fournisseurs de pièces automobiles au monde, avec plus de 35,9 milliards de dollars de ventes annuelles. Nous fournissons tous les grands fabricants automobiles au monde, en mettant à leur disposition les innovations et la qualité dont ils ont besoin pour conserver une longueur d'avance en matière de technologie automobile. En plus de nos clients du secteur automobile, nous fournissons également des pièces à tous les fabricants OE à travers le monde. Depuis des décennies, nous avons aidé tous nos clients à devenir des géants dans leurs secteurs d'activités.

Qualité inégalée

Chez DENSO, nous savons que l'une des clés majeures de la réussite de notre entreprise et de nos clients est l'engagement sans faille pour la qualité. Nous recherchons et nous obtenons l'objectif « zéro défaut » pour les millions de pièces fabriquées dans les usines DENSO, qui sont certifiées aux normes TS16949, ISO9000 et ISO14000. Ce dévouement pour la qualité est clairement reconnu par l'industrie et se traduit par les prestigieux prix attribués à DENSO tels que le prix Deming Award pour la qualité, le prix J.D. Power and Associates Chairman's Award et plusieurs prix des clients pour la qualité, attribués par des entreprises telles que Toyota, Lexus, General Motors et Chrysler.

La meilleure qualité sur le marché des pièces de rechange

Dans les années 1980, DENSO devint le premier à produire en masse la bougie d'allumage en platine et à l'offrir au marché des pièces de rechange. Une décennie plus tard, nous avons introduit la bougie d'allumage la plus

perfectionnée au monde, Iridium Power®, qui a révolutionné le concept de bougie de performance sur le marché des pièces de rechange. Vers la fin des années 1990, le monde a observé avec un grand intérêt l'innovation par DENSO, par le biais d'une gamme de pièces de remplacement haut de gamme conformes aux normes OE sous la marque First Time Fit®. De nos jours, la gamme de produits First Time Fit comprend des compresseurs de climatisation, des filtres à air d'habitacle, des condenseurs, des évaporateurs, des

DENSO est l'un des plus grands fournisseurs de pièces automobiles au monde, avec plus de 35,9 milliards de dollars de ventes annuelles.

radiateurs, des réservoirs déshydrateurs, des dispositifs d'expansion, des démarreurs, des alternateurs, des capteurs d'oxygène, des pompes à carburant, des filtres à huile et à air, des jeux de câble d'allumage, capteur du système de surveillance de la pression des pneus, capteurs de gestion du moteur et des balais d'essuie-glace.

Supérieurs de par leur conception Comme vous le constatez, au cours des décennies, nous avons perfectionné notre art, ce que peu de fabricants de pièces automobiles peuvent affirmer. L'engagement de DENSO pour la qualité, l'innovation et la technologie avancée, est clairement la raison pour laquelle nos pièces automobiles et nos pièces pour machineries lourdes sont véritablement supérieures de par leur conception.

COMMENT UTILISER CE CATALOGUE

Pour trouver une unité selon l'application (section Application) :

- Localisez l'application sur la page. Les applications sont organisées par année, marque, modèle et type de moteur.
- Trouvez la ligne de l'application qui décrit les options du véhicule et localisez le numéro de pièce.

Pour trouver un numéro de pièce DENSO selon un autre numéro de pièce (section Référence croisée) :

- 1. Localisez l'étiquette de numéro de pièce sur l'unité.
- 2. Localisez la section Référence croisée de ce catalogue.
- 3. Localisez le nom du fabricant et le numéro de pièce.
- 4. Les numéros de pièce DENSO sont indiqués dans la colonne située à droite du numéro d'unité.

Pour comparer la pièce à la liste de numéros de pièces (section Guide photo) :

- Trouvez la liste des numéros de pièces de la façon décrite ci-dessus.
- 2. Localisez la section Guide photo de ce catalogue.
- Trouvez le numéro de pièce DENSO indiqué dans le catalogue. Les images sont classées par numéro DENSO.
- 4. Comparez les spécifications d'unité publiées à l'unité provenant du véhicule.

MISES À JOUR DISPONIBLES SUR INTERNET

Pour les renseignements les plus récents et des images additionnelles des produits DENSO, visitez le site web du marché de l'après-vente de DENSO. Allez à www.DensoAutoParts.com et cliquez sur « Trouver ma pièce » dans le haut de la page.

- 1. Allez à www.DensoAutoParts.com
- 2. Cliquez sur « Trouver ma pièce » dans le haut de la page.
- Sélectionnez votre produit par type ou référence croisée.
- 4. Sélectionnez l'année, la marque et le modèle de votre application.
- 5. Cliquez sur Envoyer.

L'écran affichera les renseignements sur le numéro de pièce et l'application. Si une image ou un schéma est disponible, vous verrez l'icône d'une image. Cliquez wsur l'icône pour voir l'image ou les images.

LE COMPOSANT ESSENTIEL DU MOTEUR

Le capteur qui mesure les gaz d'échappement est un composant essentiel du véhicule moderne de nos jours. Ce capteur fonctionne avec l'unité de commande électronique du véhicule (ECU) pour maintenir en permanence l'efficacité de fonctionnement du moteur. Si le taux d'oxygène du gaz d'échappement est trop élevé (mélange pauvre) ou trop bas (mélange riche), le capteur est capable de transmettre cette information à l'ECU, qui ajuste par conséquent le rapport air/carburant.

Tous les véhicules ne disposent pas de capteurs pourvus des mêmes caractéristiques de sortie et ces capteurs ne sont pas interchangeables. Il est important de confirmer le type de capteur avant d'effectuer la réparation.

Dans les véhicules pourvus de capteur d'oxygène chauffant, la tension de sortie change suivant la concentration en oxygène du gaz d'échappement. L'ECU utilise cette tension de sortie pour déterminer si le rapport air/carburant présent est plus riche ou plus pauvre que le rapport stœchiométrique air/carburant (14,7:1).

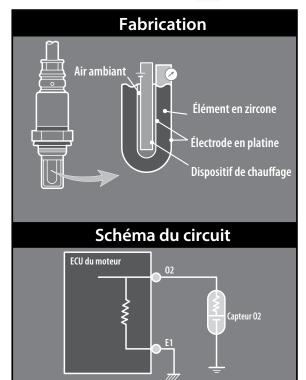

Les véhicules pourvus d'un capteur de rapport air/carburant disposent d'environ 0,4 V appliqué en permanence sur le capteur, ce qui libère un courant qui varie suivant la concentration en oxygène du gaz d'échappement. L'ECU convertit les changements au niveau du courant de sortie en tension, ce qui permet une réaction directement proportionnelle à l'entrée du rapport air/carburant présent dans le système d'échappement.

DIFFÉRENCES ENTRE UN CAPTEUR D'OXYGÈNE ET UN CAPTEUR D'AIR/CARBURANT

L'aspect extérieur du capteur d'air/carburant et du capteur d'oxygène peut être très identique mais la similarité se limite à ce point. Suivant l'analogie de l'ampoule électrique, le capteur d'oxygène envoie une tension à l'unité de commande du moteur du véhicule et agit en tant que commutateur marche/arrêt allumant et éteignant l'ampoule. Le capteur d'air/carburant reçoit la tension provenant de l'unité de commande du moteur du véhicule et agit comme un commutateur de veilleuse augmentant et réduisant la luminosité.

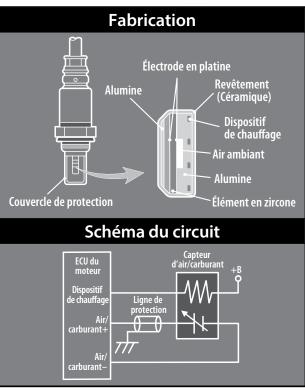

Capteur d'oxygène

Capteur d'air/carburant

TECHNOLOGIE SUPÉRIEURE DE CAPTEUR D'OXYGÈNE

CONCEPTION SUPÉRIEURE

Maximise la performance du moteur et l'efficacité du carburant tout en réduisant les émissions nocives.

DOUBLE COUVERCLE DE PROTECTION

Maintient une température appropriée de l'unité pour fournir un temps de réaction plus rapide et protéger l'élément en céramique contre la contamination à la silicone ou au plomb.

COUCHE DE CAPTAGE EN OXYDE D'ALUMINIUM

Préserve l'élément en céramique contre la silicone et le plomb par le biais de la conception exclusive de DENSO, évitant l'endommagement de l'électrode en platine.

BOÎTIER EN ACIER INOXYDABLE

Résiste à la corrosion et à la contamination avec un corps robuste et étanche.

FILTRE EN PTFE POREUX

Permet à l'oxygène atmosphérique d'entrer dans le capteur, en empêchant l'eau et les contaminants du moteur de suinter dans l'enveloppe extérieure.

Conçu avec précision. Fabriqué selon les normes OE les plus strictes. Soumis à de rigoureux tests de sécurité et de performance. Ces éléments sont les outils de construction de base qui soutiennent les capteurs d'oxygène First Time Fit de DENSO, la nouvelle gamme disposant de configurations chauffantes et non chauffantes dont le bon ajustement dès le premier essai et à chaque essai est garanti. Cette gamme innovante caractérise la couche de captage en oxyde d'aluminium exclusive de DENSO, conçue pour protéger l'élément en céramique contre la contamination à la silicone ou au plomb, pour une performance moteur améliorée, une efficacité du carburant plus importante et une longévité sans pareil. Bien sûr, la gamme First Time Fit des capteurs d'oxygène n'est que l'une des multiples innovations de conception. First Time Fit de DENSO, supérieurs de par leur conception.

TECHNOLOGIE SUPÉRIEURE DU CAPTEUR D'AIR/CARBURANT

Capteur d'air/carburant

Comme avec le capteur d'oxygène, le capteur d'air/carburant détecte la concentration en oxygène des émissions d'échappement. Cependant, les véhicules pourvus de ce capteur disposent d'environ 0,4 V appliqué en permanence sur le capteur d'air/carburant, ce qui libère un courant qui varie suivant la concentration en oxygène du gaz d'échappement. L'ECM convertit les changements au niveau du courant de sortie en tension, ce qui permet une réaction directement proportionnelle à l'entrée du rapport air/carburant présentement détecté.

Caractéristiques et avantages

- Activation rapide de l'électrolyte solide en zircone
 Le capteur d'air/carburant de type planaire de DENSO dispose d'un électrolyte solide en zircone avec un substrat
 chauffant en alumine intégré, ce qui lui permet de détecter plus rapidement la concentration en oxygène avec un
 temps d'allumage de 10 secondes.
- Détection de haute précision
 Contrôle précisément la quantité d'ions oxygène qui se déplacent dans la couche de diffusion, afin de limiter le débit du courant, ce qui engendre une détection de haute précision.

Types de produits air/carburant

| DISPOSITIF DE CHAUFFAGE | - | | | | |

IDENTIFICATION DE LA POSITION DU CAPTEUR D'OXYGÈNE

De nombreux catalogues de fabricants identifient le positionnement du côté droit et du côté gauche, mais citent l'emplacement des capteurs en termes de numéro de bloc et de capteur (par exemple : Bloc 1, Capteur 1) pour les outils de diagnostic. La définition du côté droit et du côté gauche par rapport aux emplacements d'un analyseur-contrôleur peut s'avérer difficile.

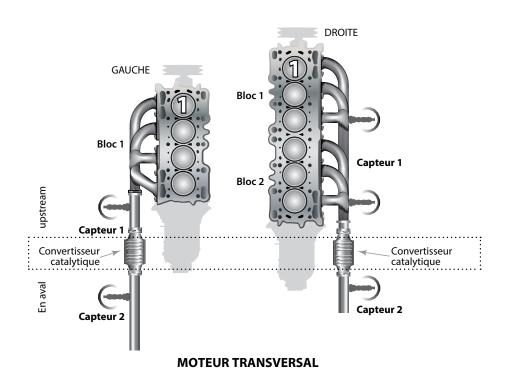

En règle générale, le cylindre principal (Cylindre 1) désigne le Bloc 1. Les cylindres principaux ci-dessous sont mis en exergue dans les modèles réels de moteur pour différencier le Cylindre 1.

DENSO définit le côté droit et le côté gauche du bloc moteur du point de vue de la transmission en direction de la poulie de vilebrequin.

Les illustrations d'orientation du moteur longitudinal représentent une propulsion arrière. En ce qui concerne les moteurs transversaux (traction avant), les concepts sont les mêmes, bien que l'orientation de montage soit à un angle de 90 degrés vers la gauche ou la droite du moteur longitudinal.

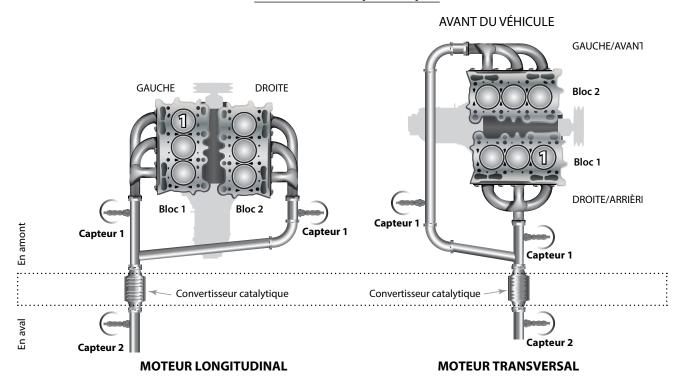

Monocylindrique ou 4/5/6 cylindres fractionnés en ligne

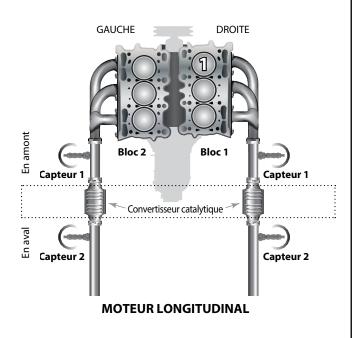

Les configurations des moteurs varient. Veuillez consulter votre manuel d'entretien ou les références techniques en ligne pour configurer le moteur correctement.

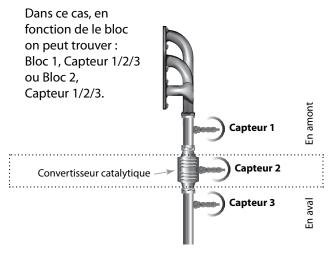

V6/8/10, escape simple

Double échappement, type V6/8/10

Systèmes d'échappement à trois capteurs

Les configurations des moteurs varient. Veuillez consulter votre manuel d'entretien ou les références techniques en ligne pour configurer le moteur correctement.

REMARQUES

ACERCA DE DENSO

Un legado de equipos originales (OE, por sus siglas en inglés)

DENSO es uno de los proveedores de componentes de la industria automotriz más grandes a nivel mundial con más de \$35.9 mil millones de ventas anuales. Proveemos a todos los principales fabricantes de automóviles del mundo y les brindamos la calidad e innovación que necesitan para permanecer a la vanguardia de la tecnología automotriz. Además de nuestros clientes de esta industria, también proveemos componentes a casi todos los fabricantes de equipos originales en todo el mundo. Durante décadas, hemos ayudado a todos nuestros clientes a convertirse en gigantes dentro de sus industrias.

Calidad insuperable

En DENSO sabemos que una de las claves principales del éxito para nuestra compañía y nuestros clientes es el compromiso inquebrantable con la calidad. Nos esforzamos y logramos que no haya defectos en las partes fabricadas de a millones en las instalaciones de DENSO certificadas bajo las normas TS16949, ISO9000 e ISO14000. Esta dedicación a la calidad es claramente reconocida por la industria, dado que DENSO ha recibido premios prestigiosos, como el premio Deming (Deming Award) por calidad, el premio del Presidente de J.D. Power and Associates (J.D. Power and Associates Chairman's Award) y numerosos premios de proveedores por la calidad, otorgados por empresas como Toyota, Lexus, General Motors y Chrysler.

Todo en el mercado de posventa

En la década de 1980, DENSO se convirtió en el primero en producir en serie la bujía de encendido de platino y ofrecerla en el mercado de posventa. Una década más tarde, presentamos la bujía de encendido más avanzada del mundo, la Iridium Power® la cual revolucionó el concepto de bujía de rendimiento en el mercado de posventa.

A fines de la década de 1990, el mundo observó con un gran interés cómo DENSO anunciaba una línea de componentes de reemplazo estándar de equipos originales de calidad superior bajo la marca First Time Fit[®]. Actualmente, la línea de productos First Time Fit incluye: compresores de AA, filtros de aire de cabina, condensadores, evaporadores, radiadores, receptores secadores, dispositivos de expansión, arrancadores, alternadores, sensores de oxígeno, bombas de combustible, filtros de aceite y de aire, juegos de cables de encendido, sensor del sistema de control de presión

DENSO es uno de los proveedores de componentes de la industria automotriz más grandes a nivel mundial con más de \$35.9 mil millones de ventas anuales.

de los neumáticos, sensores de administración del motor y escobillas limpiaparabrisas.

Mejor por su diseño

CÓMO UTILIZAR ESTE CATÁLOGO

Para buscar una unidad según su aplicación (Sección Aplicación):

- Ubique la aplicación en la página. Las aplicaciones están ordenadas por año, marca, modelo y tipo de motor.
- 2. Busque la línea de aplicación que describe las opciones del vehículo y ubique el número de parte.

Para buscar un número de parte DENSO utilizando un número de parte alternativo (Sección Equivalencias):

- 1. Ubique la etiqueta del número de parte en la unidad.
- 2. Ubique la Sección Equivalencias de este catálogo.
- 3. Ubique el nombre del fabricante y el número de parte.
- 4. Los números de partes DENSO aparecen en la columna que se encuentra a la derecha del número de unidad.

Para comparar la parte con el listado de números de partes (Sección Guía fotográfica):

- 1. Busque el listado de números de partes como se describió anteriormente.
- 2. Ubique la Sección Guía fotográfica de este catálogo.
- 3. Busque el número de parte DENSO que se encuentra en este catálogo. Las imágenes están ordenadas por número de parte DENSO.
- 4. Compare las especificaciones publicadas de la unidad con la unidad del vehículo.

ACTUALIZACIONES EN INTERNET

Para obtener la información más reciente de aplicaciones e imágenes de los productos DENSO, visite el sitio web del mercado de posventa de DENSO. Ingrese en www.DensoAutoParts.com y haga clic en el enlace "Buscar mi parte" en la parte superior de la página.

- 1. Ingrese en www.DensoAutoParts.com
- 2. Haga clic en el enlace "Buscar mi parte" en la parte superior de la página.
- 3. Seleccione el producto según el tipo o por equivalencia.
- 4. Seleccione el año, la marca y el modelo de su aplicación.
- 5. Haga clic en ENVIAR.

La pantalla le mostrará el número de parte y la información de la aplicación. Si hay una imagen o un diagrama disponible, verá un icono de imagen. Haga clic en el icono para ver las imágenes.

EL COMPONENTE ESENCIAL DEL MOTOR

Un componente esencial del vehículo moderno actual es el sensor que mide los gases de escape. Este sensor funciona con la unidad de control electrónica (ECU, por sus siglas en inglés) para mantener constantemente el rendimiento del funcionamiento del motor. Si el contenido de oxígeno en el gas de escape es muy elevado (mezcla pobre de combustible) o muy bajo (mezcla rica de combustible), el sensor puede transmitir esta información a la ECU, la cual luego regula la relación aire/combustible.

No todos los vehículos tienen sensores con las mismas características de rendimiento. Además, estos sensores no son intercambiables. Es importante confirmar el tipo de sensor antes de realizar la reparación.

En vehículos equipados con sensores de oxígeno caliente, el voltaje de salida cambia según la concentración de oxígeno en el gas de escape. La ECU utiliza este voltaje de salida para determinar si la relación aire/combustible presente es más rica o más pobre que la relación aire/combustible estequiométrica (14.7:1).

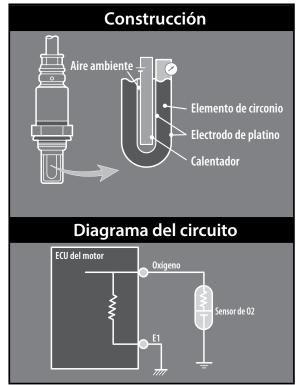

Los vehículos equipados con un sensor de relación aire/combustible tienen aproximadamente 0.4 V aplicados constantemente al sensor, el cual libera una corriente que varía según la concentración de oxígeno en el gas de escape. La ECU convierte los cambios en la corriente de salida en voltaje, lo que permite una respuesta que es directamente proporcional a la entrada de la relación aire/combustible actual en el sistema de escape.

DIFERENCIAS ENTRE UN SENSOR DE OXÍGENO Y UN SENSOR DE AIRE/COMBUSTIBLE

La apariencia externa del sensor de aire/combustible y del sensor de oxígeno puede ser muy similar, pero solo son parecidos en ese aspecto. El sensor de oxígeno, utilizando la analogía del foco de luz, envía voltaje a la unidad de control del motor del vehículo y actúa como un interruptor que enciende y apaga el foco. El sensor de aire/combustible recibe el voltaje de la unidad de control del motor del vehículo y actúa como un interruptor de graduación de la luz, el cual aumenta o atenúa el brillo de la luz.

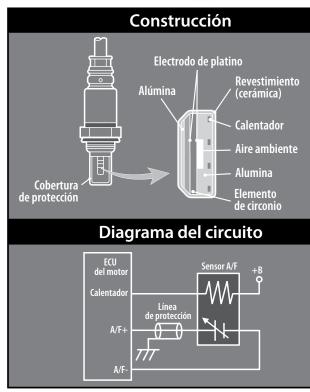

Sensor de oxígeno

Sensor de aire/combustible

TECNOLOGÍA SUPERIOR DE SENSORES DE OXÍGENO

DISEÑO SUPERIOR

Maximiza el rendimiento del motor y del combustible, a la vez que reduce las emisiones nocivas.

CUBIERTA DE PROTECCIÓN DOBLE

Mantiene la temperatura adecuada de la unidad para brindar tiempos de respuesta más rápidos y protege el elemento de cerámica contra la contaminación causada por la silicona y el plomo.

CAPA PROTECTORA DE ÓXIDO DE ALUMINIO

El exclusivo diseño de DENSO evita que la silicona y el plomo ingresen al elemento de cerámica y dañen el electrodo de platino.

CARCASA DE ACERO INOXIDABLE

Resiste la corrosión y la contaminación mediante un cuerpo fuerte y estanco.

FILTRO POROSO DE PTFE

Permite que el oxígeno atmosférico ingrese al sensor sin dejar que el agua o los contaminantes del motor se filtren dentro de la carcasa.

Diseñado con precisión.

Fabricado bajo las normas más estrictas para
OE. Sometido a rigurosas pruebas de seguridad
y rendimiento. Estas son las herramientas esenciales
que se utilizan en la fabricación de los sensores de oxígeno
First Time Fit de DENSO: una nueva línea de configuraciones
calientes y no calientes que siempre garantizan el ajuste correcto
desde el primer momento. Esta línea innovadora cuenta con la
exclusiva capa protectora de óxido de aluminio de DENSO, diseñada para
proteger el elemento de cerámica contra la contaminación causada por la silicona
y el plomo. Además, brinda un mayor rendimiento del motor y del combustible y una
duración inigualable. Por supuesto, la línea de sensores de oxígeno First Time Fit es tan solo
una de las tantas innovaciones de diseño. First Time Fit de DENSO, mejor por su diseño.

TECNOLOGÍA SUPERIOR DE SENSORES DE AIRE/COMBUSTIBLE

Sensor de aire/combustible

Al igual que el sensor de oxígeno, el sensor de aire/combustible detecta las concentraciones de oxígeno en las emisiones de escape. Sin embargo, los vehículos equipados con este sensor tienen aproximadamente 0.4 V aplicados constantemente al sensor de aire/combustible, el cual libera una corriente que varía según la concentración de oxígeno en el gas de escape. El ECM (módulo de control electrónico) convierte los cambios en la corriente de salida en voltaje, lo que permite una respuesta que es directamente proporcional a la entrada de la relación aire/combustible actual detectada.

Características y beneficios

- Activación rápida del electrolito sólido de circonio
 El sensor de aire/combustible de tipo plano de DENSO tiene un electrolito sólido de circonio integrado con sustrato calentador de alúmina que le permite detectar de manera más rápida las concentraciones de oxígeno con un tiempo de apagado de 10 segundos.
- Detección de gran exactitud
 Controla de manera precisa la cantidad de iones de oxígeno que fluye en la capa de difusión para limitar el flujo de corriente, lo que provoca una detección de gran exactitud.

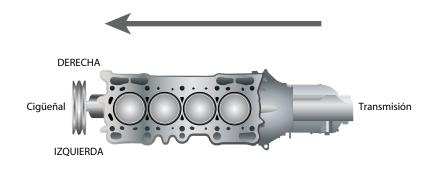

Tipos de productos de aire/combustible

| Tipo de producto | Calentador | Tiempo de apagado (segundos) | Tiempo de respuesta (milésimas de segundo) | | |
|-------------------------------|-------------------------------------|---------------------------------|---|--|--|

CÓMO IDENTIFICAR LA POSICIÓN DEL SENSOR DE OXÍGENO

Muchos catálogos de fabricantes identifican la posición de lado derecho y de lado izquierdo; sin embargo, en el caso de las herramientas de diagnóstico, las ubicaciones de los sensores se indican por medio del número de banco y de sensor (por ejemplo: banco 1 sensor 1). Relacionar derecha e izquierda con las ubicaciones de las herramientas de exploración puede ser todo un desafío.

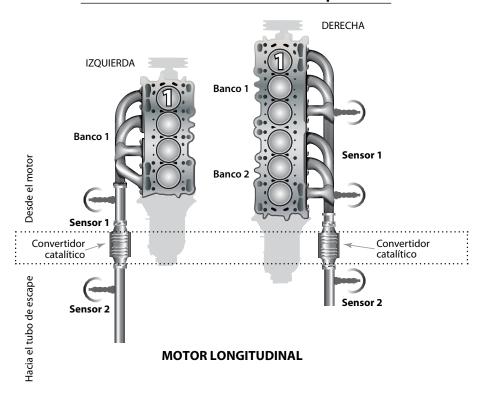

Como regla general, el cilindro principal (cilindro 1) es el que designa el banco 1. Los cilindros principales a continuación se muestran de manera exagerada en

DENSO clasifica los lados izquierdo y derecho del bloque motor vistos desde la transmisión hacia la polea del cigüeñal.

relación con los diseños reales del motor, para así destacar el cilindro 1.

Las ilustraciones de la orientación del motor longitudinal muestran un motor de tracción trasera. En los casos del motor transversal (tracción delantera), los conceptos son los mismos; sin embargo, la dirección de montaje tiene una rotación de 90 grados hacia la izquierda o derecha respecto del motor longitudinal.

De 4/5/6 cilindros en línea o separados

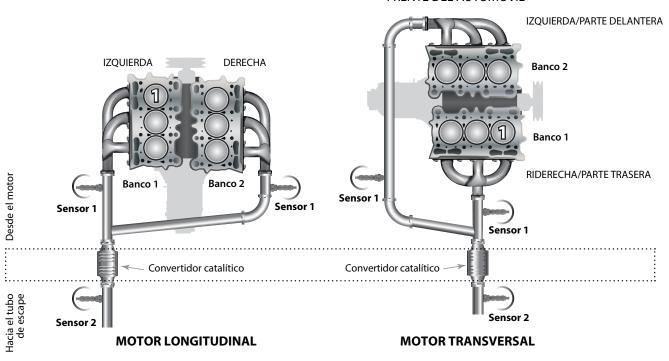

Las configuraciones de los motores varían. Consulte su manual de mantenimiento o las referencias técnicas en línea para obtener la configuración exacta del motor.

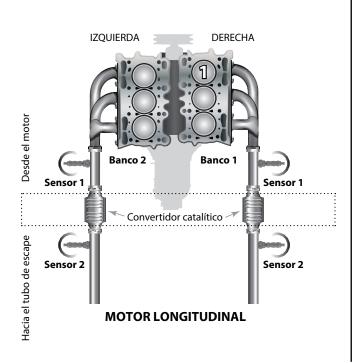

V6/8/10, escape simple

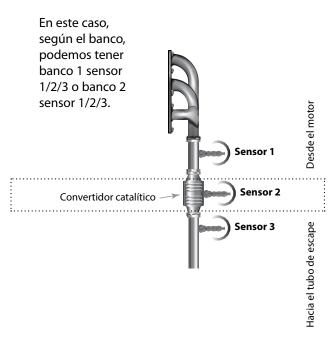

V6/8/10, escape doble

Sistemas de escape de tres sensores

Las configuraciones de los motores varían. Consulte su manual de mantenimiento o las referencias técnicas en línea para obtener la configuración exacta del motor.

Causas de los códigos de aire/combustible

Causas de una condición de mezcla rica

• Filtro de aire obstruido

· ECU defectuosa

· Medidor de masa de aire defectuoso

• Medidor de flujo de aire defectuoso

· Sensor MAP defectuoso

· Válvula de control de ralentí defectuosa

• Regulador de presión de combustible defectuoso

• Inyector(es) de combustible defectuoso(s)

• Tubería de retorno de combustible obstruida

• Bujía(s) de encendido sucia(s)

• Cable(s) de encendido defectuoso(s)

· Ajuste de encendido

• Sensor de oxígeno defectuoso

• Sensor de aire/combustible defectuoso

PCV defectuosa

• EVAP defectuoso

· Cableado asociado

• Temperatura refrigerante del motor

Causas de una condición de mezcla pobre

· Pérdida de vacío

• ECU defectuosa

· Medidor de masa de aire defectuoso

• Medidor de flujo de aire defectuoso

• Sensor MAP defectuoso

• Válvula de control de ralentí defectuosa

• Regulador de presión de combustible defectuoso

· Bomba de combustible defectuosa

Filtro de combustible obstruido (malla

• Inyector(es) de combustible defectuoso(s)

PCV defectuosa

Cableado asociado

• Pérdida de gas de escape

• Sensor de oxígeno defectuoso

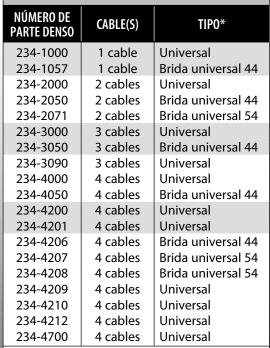

• Sensor de aire/combustible defectuoso

· Ajuste de encendido

PRODUCT INFORMATION RENSEIGNEMENTS SUR LE PRODUIT INFORMACIÓN DEL PRODUCTO

OXYGEN & AIR/FUEL SENSOR

CAPTEUR D'OXYGÈN ET D'AIR/CARBURANT

SENSOR DE OXÍGENO Y DE AIRE/COMBUSTIBLE

Lead Wire Length

The photo guide describes sensor lead wire length in the following perspective:

Measure from the bottom of the hex/flange to the end of the connector.

Longueur de fil électrique

Le guide photo décrit lalongueur de fil électrique du capteur du capteur dans la perspective suivante :

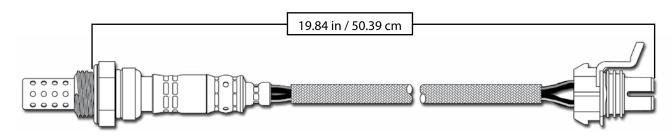

Mesurez à partir du bas du dispositif hexagonal/de la bride jusqu'à l'extrémité du connecteur.

Longitud del cable conductor

La guía fotográfica describe la longitud del cable conductor del sensor de la siguiente manera:

Medida desde la parte inferior del reborde del hexágono hacia el extremo del conector.

Flange Gasket Measurement

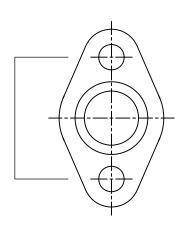

Measure from the center of one mounting hole to the center of the other.

Mesure de joint de bride

Mesurez à partir du centre d'un trou de montage au centre de l'autre.

Medición de la junta de brida

Medida desde el centro de uno de los orificios de montaje al centro del otro orificio.

SENSOR 4-WIRE COLOR COMPARISON COMPARAISON DES COULEURS DES 4 FILS DU CAPTEUR COMPARACIÓN DE COLORES DE LOS 4 CABLES DEL SENSOR
